

CCG QIPP Accelerator

Maximising your delivery of QIPP targets

Improve visibility. Increase accountability. Enable delivery.

Your Challenge

The size of the challenge facing health and Social Care budgets is significant. Collectively QIPP programmes are charged with delivering in excess of £30bn recurring annual savings to simply keep up with anticipated demand.

CCG leaders face ever increasing demands arising from an ageing population and long-term health conditions with budgets in the foreseeable future expected to be based on a 'flat cash' basis at best. Plans to bring Health and Social Care budgets together through the Better Care Fund add to the complexity and challenge of achieving your QIPP targets.

Our Solution

Sirius Partners has developed the QIPP Accelerator to help you get back in the driving seat and take control of QIPP delivery programmes. Our ability to rapidly diagnose current operational and financial performance against agreed plans makes the first step to long-term delivery an easy one. Once you have a clear understanding of where there are delivery issues, our QIPP Accelerator will help you to put in place credible plans and ensure progress against them is visible to all stakeholders, maximising your chances of future success. We will show you how to:

- Control your QIPP Programme
- Hold organisations in your local health economy to account for their part in delivery
- Prioritise activities which deliver the greatest return on investment
- Implement a real-time view of progress against plans
- Understand where there is duplication, inefficiency and poor return-on-investment
- Quickly and easily produce reports with accurate and up-to-date content
- Ensure QIPP reporting is a by-product of your daily activities

How the CCG QIPP Accelerator can help you

- Establishes a single source of QIPP performance with health economy-wide reporting to improve visibility and accountability
- Automates programme and project reporting freeing-up your time to focus on delivery
- Improves internal capability so you are in control without reliance on external agencies
- Enables appropriate prioritisation by understanding the inter-relationships between QIPP Programme deliverables and strategic and operational benefits
- Reduces risk to QIPP delivery by identifying and mitigating programme risks

Why Sirius Partners?

The Sirius Partners team has an impressive pedigree in supporting organisations with delivery of QIPP targets and have delivered significant savings for our clients. Our credentials include:

- Significant hands-on experience of working with Commissioners, Providers and other NHS stakeholders
- An understanding that every penny counts and that the NHS faces significant financial and delivery challenges
- An in-depth understanding of the politics, structures and complexity of the NHS
- With a relentless focus on a remarkable customer experience we will deliver outstanding return-on-investment
- Provision of QIPP Accelerator through the G-Cloud Crown Commercial Service procurement framework
- As ex-NHS Directors, tax payers and patients, we are passionate about making a difference in the NHS
